

Parker-Davis Project Marketing Process Questions and Answers

Question: Hello, I am requesting clarification on the application requirements for the solicitation to apply for the allocation of hydropower from the Parker-Davis project. After reviewing the draft public notice, I understand that NV Energy, a regulated public utility, is not eligible to apply because we are not a preference entity as defined in the notice (i.e. cities and towns, irrigation districts, public utility districts, and rural electric cooperatives). Please confirm, as if I am misunderstanding the requirements, we would be interested in pursuing this opportunity.

Answer: Yes, your understanding is correct. NV Energy, as an investor-owned utility, does not qualify under NAC 538.410 for an allocation from P-DP.
